**styling possibilities**

**status**

**exclusive solutions**

Our mission is **TO CREATE**

To create beautiful and useful products  
for arrangement of working areas.

To create areas for the development of people  
and companies.

# ecology of environment feel the harmony

Most of our life passes inside four walls: home, office, sports hall. Which is why it is important to have around us a user-friendly, ecologically sound environment throughout this long period of time. The NAYADA-Intero system will provide you with not only beauty, but ecology of your space as well.

Besides the clean materials used in partition production, and the minimization of waste in construction the NAYADA-Intero system guarantees a high level of acoustic insulation. Protection from noise promotes not only the comfort of your stay in an area, but a good state of health throughout the days, weeks and years – for life.

Thanks to the design features of NAYADA-Interio the high level of acoustic insulation is guaranteed even for glass sections.

The construction of NAYADA-Interio makes it possible to build lighting fixtures into the partition panels.

# personalization of space be yourself

We — office inhabitants — are very different. We might be emotionally open or closed, we like different materials and shapes, we prefer different colours. Although we are in the same team and advance to the common goal, each of us in the office would like to create an individual atmosphere, which suits their personality and allows him or her to work comfortably.

How can we meet the individual preferences of various people and maintain office unity? The NAYADA-Intero system solves this problem and puts people in a good mood.

Double swing doors of dual plate-glass leaf up to 3 m high have been developed specially for the NAYADA-Intero system.

All possible variants for decorative glass processing, including coloring, glazing and sand-jet blasting are available.

# functionality enjoy the result

Functionality is not only about effective technology. It is, firstly, convenience and getting the most out of time and effort spent at work.

The functional NAYADA-Intero system, with its multiple accessories — shelves, built-in cabinets, with its ability to safely conceal electric services inside the partition, with its control of the privacy and illumination in the accommodation using Venetian and roller blinds will improve your productivity at work.

The partition design allows the installation between glasses of either Venetian or roller blinds.

Any services can be laid inside the partition. There is a special plinth for mounting electrical sockets.

interglass blinds

# styling possibilities live bright

The NAYADA-Intero system, with its wide styling possibilities, multiple shapes, shelves, built-in cupboards and attachments, makes it possible to create a modern, stylish and interesting office.

NAYADA-Intero, as a part of a solution concept for arranging office space, provides connections to any other partition types.

The sliding doors of the NAYADA-Intero system offer maximum convenience and space saving. The door suspension system (track) is completely concealed in the narrow horizontal frame.

rolling-in doors

Shelves and built-in cabinets are a part of NAYADA-Interio system and they are constructed using the same base elements as the partition itself.

connection to single-glass partition  
and hang-on accessories

# status make a statement

The head of the company.

It is hard to overestimate the role of this person. A captain, leading his ship over troubled business waters. Each detail of the office of this person should speak of the importance, seriousness and weight of decisions taken here. The NAYADA-Intero system will make it possible to create an office appropriate to the status of its owner.

Partition panels of NAYADA-Intero systems can be decorated with various materials, for example, veneered or leathered.

As an additional option, to order, the panels of the NAYADA-Intero system can be finished using the same materials as for the furniture

leather finish

# exclusive solutions think outside the box

Functionality and convenience, beauty and ecology are a standard set of requirements, which we offer. But sometimes this standard set is not enough. Our mind and eyes want something more: different lines, another mood. The NAYADA-Intero system allows the creation of non-standard design-solutions even in standard offices.

A 5m radius of curvature of the partition can be achieved using standard panels.

In non-standard situations, the partition can be made 6m high without additional measures to ensure design stiffness.

**NAYADA-International** is incorporated into the NAYADA group of companies, and has worked on the construction of commercial facilities since 1995. The NAYADA group focuses its efforts on the development and production of partition systems, as well as supplying complete systems for organising space in business premises.

The company consists of a design bureau, distributed production (Italy, Russia, Ukraine, Kazakhstan, Byelorussia) and warehouse facilities. We conduct our activities in the territories of the CIS and the EU. In our product portfolio there are 9 partition systems. Depending on the demands of one or another regional market, we produce the appropriate products. In Europe we offer our Customers the following systems:

NAYADA-Intero, NAYADA-Hufcor, NAYADA-Standard. Furthermore, we are willing to execute non-standard orders for our customers. Yearly, we realize more than **4000** projects.

Clients of the NAYADA group include the following: Raiffeisenbank, PricewaterhouseCoopers, CitiBank, Danone, Ernst & Young, General Motors, Nike, Hewlett-Packard, Philip Morris, Samsung, Cisco Systems, Procter&Gamble and many other respected companies.

The company works to improve the technical specification of its partitions, constantly carrying out various system tests. At the same time we try to provide our customers with irreproachable service — rapid preparation of our commercial proposals, post-guarantee service of our systems, staff always accessible.

In 2005 the NAYADA company quality management system was certified to international quality standard ISO9001:2000. We are concerned about ecology and that is why we take a responsible approach to material selection for our products, arranging production processes, recycling, process systems of assembly and dismantling. From 2007 the company became a member of the International Fund of wildlife protection.
